Column tailift with aluminium platform

Description of lift

Our DL750G column tailift is a lightweight alternative for 3.5 tonne vehicles. With a installed weight of just 180 kilos, it gives operators the ability to lift heavier items and helps maximise vehicle payload.

Application

To suit Luton, Curtainsider, Flat bed and dropside bodies on 3.5 tonne vehicles.

Benefits

- Standard range with variations to satisfy your needs
- Increased payload
- Lower installation cost
- Nationwide product support
- Minimal running costs
- Rugged simplicity
- Operator safety
- Comprehensive warranty

Standard features

- Power pack incorporated within tailift frame to reduce installation and service times plus offering excellent protection from the weather/road elements.
- Fully galvanised steelwork for added protection against corrosion.
- Torsion assisted platform to ensure minimal effort required to open and close.

Tailift specification

Model	Lifting capacity	Platform material	Platform depth	Ramp depth	Lifting height	Voltage of tailift	Weight
DL750G	750kg	Aluminium	815mm	205mm	1060mm	12v	180kgs
